

## Framed vs Frameless Cabinets

All kitchen cabinets are built as **Framed** (the traditional American style) or **Frameless** (also known as European style). You can determine your style of cabinets in two different ways:

### 1 LOOK AT CABINET BOX CONSTRUCTION

#### Framed

A face frame is attached to the front of the cabinet box.

#### Frameless

No face frame is attached to the cabinet box.

### 2 LOCATION OF WHERE HINGE IS ATTACHED

#### Framed

Door hinges are attached to cabinet frame.

#### Frameless

Door hinges are attached to cabinet box.
