

COLOR-MATCHED PAINT CODES

RECOMMENDED PAINT

All of our paint is color matched to our doors and fronts. This latex (water-based) paint has a satin finish with excellent strength, adhesion, and color integrity over time. For good adhesion, it's critical that you clean the old surface and sand it to a dull appearance, but a primer is not required.

ALTERNATIVE PAINT

We have worked with Sherwin-Williams to provide the following formulas to match our doors. Using their "Duration" paint base, have the store follow the exact measurements below.

CAUTION: Our customers often run into trouble when sourcing their own paint. Mistakes can happen during ordering or mixing. The tint dispensers at different paint stores vary from one to another. Painters may substitute one product for another or thin the paint, trying to increase coverage. If the wrong paint is used, this can be an expensive error to remedy – removing the installed doors, sanding and repainting, and replacing the doors. We will not be responsible for color match when a customer purchases paint from another source. Buying color-matched paint from this retailer is always your best option.
